DETAILED ACTION

1. Formal Matters

- A. The Preliminary Amendment dated 12/6/01 has been entered into the record.
- B. The Preliminary Amendment dated 9/9/02 has been entered into the record.
- C. The Information Disclosure Statement dated 3/12/02 has been entered into the record.
- D. The Information Disclosure Statement dated 11/4/02 has been entered into the record.
- E. Claims 28-33 are pending and are the subject of this Office Action.

2. Priority

Due to the excessive number of applications from which the present application claims benefit, priority cannot be determined. If Applicants are relying on a parent application in any argument, it is incumbent upon the applicant to provide the serial number and specific page number(s) of any parent application filed prior to the present application which specifically supports the particular claim limitation for each and every claim limitation in all the pending claims which applicant considers to have been in possession of and fully enabled for prior to 12/6/01.

3. Information Disclosure Statement

- A. References 7 and 8 on the IDS dated 11/4/02 have been lined through since they are not in proper format, including author and accession number.
- B. All references on the IDS dated 3/12/02 have been lined through since they are duplicates of the IDS dated 11/4/02.

4. Specification

- A. Though none could be found, due to the length of the specification, Applicants are reminded that embedded hyperlink and/or other form of browser-executable code are not permitted in the specification. See MPEP § 608.01.
- B. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. The title recites polypeptides and polynucleotides whereas the claims are drawn to antibodies.

Art Unit: 1647

5. Claim Objections

A. The syntax of claims 28-33 could be improved by replacing the phrase "shown in Figure 92 (SEQ ID NO:148)" in claims 28 and 33 with "of SEQ ID NO:148."

6. Claim Rejections - 35 USC § 112, second paragraph

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

- A. Claim 31 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is not understood how an antibody can be both an "antibody" and a "fragment." The phrase "an antibody, or fragment thereof," for example, could be used in independent claim 28 and claim 31 could be cancelled.
- B. Claim 33 is confusing since it is not clear what the definition of "specifically binds" is. This term is not defined in the specification. Furthermore, it is not clear how this claim differs from that of claim 33, where the antibody "binds" the protein of SEQ ID NO:148.

7. Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- A. Claims 28-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shibui et al. in view of Lal et al. The claims recite an antibody which binds the protein of SEQ ID NO:148. Shibui et al. teach a protein which is 54.1% identical to SEQ ID NO:148 of the present invention (Sequence Comparison). Shibui do not teach antibodies. However, Lal teach humanized antibodies (column 9, lines 23-27), monoclonal antibodies and fragments (column 34, lines 43- column 35, line 44) and labeled antibodies (column 40, lines 1-5). It would have been obvious to one of ordinary skill in the art at the time of the present invention to have made humanized, labeled, and monoclonal antibodies to the protein of Shibui for the purpose of diagnostics (label) as well as for treatment of human diseases (humanized). Monoclonal antibodies would be desired due to their peptide specificity as compared to polyclonal antibodies.

Art Unit: 1647

M-4

48. Conclusion

A. No claim is allowable.

Advisory information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert Landsman whose telephone number is (703) 306-3407. The examiner can normally be reached on Monday - Friday from 8:00 AM to 5:00 PM (Eastern time) and alternate Fridays from 8:00 AM to 5:00 PM (Eastern time).

If attempts to reach the examiner by telephone are unsuccessful, the Examiner's supervisor, Gary Kunz, can be reached on (703) 308-4623.

Official papers filed by fax should be directed to (703) 308-4242. Fax draft or informal communications with the examiner should be directed to (703) 308-0294.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0196.
